EMPATHY MAP

WHO are we empathizing with?

Type your paragraph...

Meera – EV fleet manager

Manages electric taxi fleet

Responsible for vehicle performance

Monitors battery health and charging

What do they need to DO?

Type your paragraph...

Monitor battery levels regularly

Schedule charging for vehicles

Track trips and driving range

Review vehicle performance reports

GOAL

What do they THINK and FEEL?

- Concerned about battery life and vehicle efficiency
- Wants better insights from vehicle data
- Feels responsible for maintaining smooth fleet operations
- Interested in tools that simplify decision making
- Hopes to improve performance while reducing costs

What do they SEE?

Type your paragraph...

Many EVs operating daily

Schedule charging for the fleet efficiently

Analyze data to improve fleet operations

Track driving range and vehicle performance

Make informed decisions using EV data insights

What do they HEAR?

Drivers complaining about low range

Feedback about charging delays

Technicians discussing battery issues

News about EV technology improvements

PAINS

What are their fears, frustrations, and anxieties?

Battery degradation affecting vehicle performance

Limited visibility of real-time battery analytics

Unexpected vehicle downtime due to battery issues

Difficulty predicting actual driving range

Inefficient charging schedules

GAINS

What are their wants, needs, hopes, and dreams?

Clear insights into battery performance

Accurate prediction of driving range

Better fleet efficiency and reduced downtime

Data-driven decisions for maintenance and charging

Improved vehicle utilization and cost savings

What other thoughts and feelings might influence their behavior?

Feels pressure to keep the fleet running smoothly

Worried about battery life decreasing over time

Wants reliable data to make better decisions

Hopes technology can simplify fleet management

Concerned about unexpected vehicle downtime

What do they SAY?

Type your paragraph...

“Battery performance is very important.”

“Charging time affects our operations.”

We need reliable data for decisions.”

Fleet downtime should be minimized.”

What do they DO?

Type your paragraph...

Monitor battery levels regularly

Schedule charging for vehicles

Track trips and driving range

Review vehicle performance reports

Coordinate with drivers and technicians
